

Summary

AUSGEOID93 (A.H.W. Kearsley, J. Steed)	page 1
The geoid in the central mediterranean area: determination and comparisons (R. Barzaghi, M.A. Brovelli, D. Sguerso)	page 7
A method for gross-error detection in gravity data banks (A.J. Gil, M.J. Sevilla, G. Rodriguez-Caderot)	page 25
Impact of airborne gravimetry on geoid determination: the Greenland example (R. Forsberg)	page 32
Progress on geoid determination in Europe (M. Vermeer)	page 44
Availability of altimeter data status December 1993 (C.C. Tscherning)	page 49
Is the determination of the geoid a reasonable problem? (M.A. Brovelli, F. Sansò)	page 53
The European geoid: a comparison between Fast Fourier and Fast Collocation approaches (R. Barzaghi, M.A. Brovelli, H. Denker, F. Sansò)	page 66
Oceanic tides in the Mediterranean sea (P. Vincent, P. Canceill).....	page 84
Effort toward a geoid model for South America (D. Blitzkow, D.J. Fairhead)	page 91
Meeting of the International Gravity Commission and the International Commission for the Geoid	page 92
International School for the determination and use of the geoid	page 94
E-mail address of I.Ge.S	page 99
Subscription to I.Ge.S. Bulletin	page 100
Errata Corrige	page 101
