

I.Ge.S.

### BULLETIN N. 3

#### Summary

- Design of a relational database for geodetic applications  
(F. M. Saez, A. J. Gil and G. Rodriguez-Caderot) page 1
- The IGeS global models archive  
(M. A. Brovelli, F. Migliaccio) page 11
- Accurate orthometric heights from GPS: combined network  
adjustments using GPS, differential leveling, and correlated  
geoid models  
(M. Potterfield) page 19
- Determination of the radius of the Earth  
(G.L. Strang van Hees) page 33
- On the numerical evaluation of Stokes' integral  
(E. de Min) page 41
- Development, state of the art and problems at large scale  
geoid determinations  
(W. Torge) page 47
- The geoid and the steady circulation pattern in the Mediter-  
ranean Sea  
(R. Barzaghi and G. Sona) page 67
- An attempt for a gravimetric geoid in South America  
(D. Blitzkow, J. D. Fairhead and M. C. Lobianco) page 83
- The regional model of high-degree gravitational field and the  
potential coefficient model of the Qinghai-Tibet Region  
(Yang Lu, Hsu HouTse) page 107
- National report of the Netherlands on gravity and geoid  
1990-1994 page 125
- I.GeS. : first two years of experience  
(F. Sansó) page 131
- Report on the International School for the Determination  
and Use of the Geoid  
(F. Sansó) page 134
- Report on the Gravity and Geoid Conference, Graz, Sep.  
11-17, 1994  
(H. Sünkel) page 137
